Adon Paul Tomy

Mobile developer · Applied AI · Cybersecurity student

Kerala, India · adonpaultomy@gmail.com
adonpaultomy.tech · github.com/Adon-Paul · LinkedIn

Developer building Flutter applications and Python tools, with a current focus on Linux and cybersecurity fundamentals. Interested in development roles that combine practical implementation, careful investigation and continued learning.

SELECTED PROJECTS

LumiSense

Source & architecture

Flutter / Dart / ML Kit / YOLO · Final-year prototype

- Built the application with AI assistance as part of a team academic project, combining voice-led text reading, object detection and scene descriptions.
- Integrated local perception with configurable AI providers and an optional on-device model path. Used reading-order sorting, speech chunking and debounced announcements to organise spoken output.

Melody

Source & feature documentation

Flutter / Provider / just_audio · Personal prototype

- Built a local music player with shared playback state across the full player and mini player, queue controls, persistent favourites and background audio support.
- Integrated lyrics lookup and caching. An original interface recording is available in the portfolio.

Style Transfer AI

Source & CLI documentation

Python / Ollama / optional cloud models · Co-developed experimental tool

- Co-developed a CLI exploring writing stylometry through statistical and model-assisted analysis, reusable profiles, and TXT/JSON reports.
- Supported local inference alongside optional cloud providers and separate profile backup functionality.

SKILLS & CURRENT LEARNING

Development: Flutter, Dart, Python, Git, API integration, mobile state management.
Cybersecurity study: Linux permissions, network enumeration, privilege boundaries; documented an authorised VulnHub Sunset lab in a local virtual environment.

EDUCATION & COMMUNITY

Computer Science & Engineering · VISAT Engineering College

µLearn Cybersecurity Interest Group Lead (community experience)
IEEE VISAT student chapter Finance Chair · 2022–2023

SELECTED EXPERIENCE

WeCodeLife internship · 2–16 May 2023
NASA International Space Apps Challenge participant · October 2025
